

## Inpatient Rehabilitation Facility Quality Reporting Program (IRF QRP)

### Overview of Data Elements Used for Reporting Assessment-Based Quality Measures and SPADEs Affecting FY 2022 Annual Payment Update (APU) Determination

Page 1 of 11

The Centers for Medicare & Medicaid Services' (CMS) Inpatient Rehabilitation Facility Quality Reporting Program (IRF QRP) requires IRFs to submit quality measure and standardized patient assessment data elements (SPADEs) to CMS. For a given data submission period, the Inpatient Rehabilitation Facility-Patient Assessment Instrument (IRF-PAI) submitted by an IRF must meet the APU minimum data completion threshold of no less than 95 percent of the IRF-PAI assessments having 100 percent completion of the required IRF QRP data elements. These are the standardized patient assessment data elements and the data elements needed to calculate the IRF QRP quality measures. Successful assessment completion means that the assessment does not contain non-informative responses, i.e., “dash” (–) for required data elements. **Please note that while the coding of a “dash” is an optional response value for many of the data elements listed in this table, its use does not count toward meeting the APU minimum data completion threshold.** Failure to meet the minimum threshold may result in a two (2) percentage point reduction in the IRF's APU.

Below is a table indicating the IRF-PAI data elements that are used in determining the APU minimum data completion threshold for the FY 2022 IRF QRP determination. There are two columns spanning two versions of the IRF-PAI, and reflect the appropriate reporting periods:

- (1) The IRF-PAI V3.0 (effective October 1, 2019) is used for the CY Q1 – Q3 2020 (January – September, 2020) data collection reporting period.
- (2) The IRF-PAI V4.0 (effective October 1, 2020) is used for the CY Q4 2020 (October – December, 2020) data collection reporting period.

An “X” in the table below indicates the valid assessment type and data collection reporting periods. For detailed measure specifications, please refer to the documents listed under “References” below.

**Note:** This table is limited to the data elements that are used for determining IRF QRP compliance and are included in the APU data completion threshold. There are additional data elements used to risk adjust the quality measures used in the IRF QRP. Failure to submit all data elements used to calculate and risk adjust a quality measure can affect your IRF's quality measure calculations that are displayed on the Compare website.

Note: Only data elements used in determining the APU minimum threshold for the FY 2022 IRF QRP are included in this table.

Inpatient Rehabilitation Facility Quality Reporting Program (IRF QRP)  
Overview of Data Elements Used for Reporting Assessment-Based Quality Measures Affecting FY 2022 Annual Payment Update (APU) Determination

IRF-PAI Data Elements Used for FY 2022 IRF QRP APU Determination		IRF-PAI Assessment Type		Data Collection Periods (CY 2020)	
IRF-PAI Section & Number	Data Element Label/Description	Admission	Discharge	Q1, Q2, Q3 2020 IRF-PAI V3.0	Q4 2020 IRF-PAI V4.0
O0110Z1c	Special Treatments, Procedures, and Programs: None of the Above		X		X

\* Dash (–) is not an allowable response value for this item.

\*\*These items were included on the IRF-PAI Version 3.0 on admission and were not required items. For IRF-PAI Version 4.0, effective October 1, 2020, these items were finalized as standardized patient assessment data elements and are required on both admission and discharge.

\*For the GG0130 – Self-care and GG01070 Mobility discharge goal items, at least one goal is required to be coded to fulfill requirements of the IRF QRP. A “–” dash is allowed for any remaining goal items, as long as at least one GG0130 - Self-Care or GG0170 – Mobility discharge goal item is coded with a valid code (i.e., 01, 02, 03, 04, 05, 06, 07, 09, 10, or 88).
